

Walker Decks: Mulching and Collection

Each Walker deck is uniquely configured to meet a very specific performance need. Whether the most important consideration in looking for the perfect deck is cutting width, handling grass clippings, material capacity, or grass type, there is a Walker deck that will meet the specific maintenance need.

Mulching Decks and Mulching Kits

Mulching decks and kits are designed to efficiently re-cut material to fine particles and return them to the turf, leaving a beautiful cut.

M36

- 36" (91 cm)
- Gear Drive
- Compatible with Models S, C19, C19i, T, D, and B

M42

- 42" (107 cm)
- Gear Drive
- Compatible with Models S, C, T, D, and B

M42B

- 42" (107 cm)
- Gear Drive
- Compatible with Models S, C, T, D, and B

S42-R Mulch Kit

- Mulch Kit for S42-R
- P/N 1692-19
- Compatible with Model R only

M48

- 48" (122 cm)
- Gear Drive
- Compatible with Models S, C, T, D, B, and H*

S48-R Mulch Kit

- Mulch Kit for S48-R
- P/N 1692-20
- Compatible with Model R only

M52

- 52" (132 cm)
- Gear Drive
- Compatible with Models T, D, B and H*

S52 Mulch Kit

- Mulch Kit for S52
- P/N 8691
- Compatible with Models C, T, D, B, and H*

S61 Mulch Kit

- Mulch Kit for S61
- P/N 2692-1
- Compatible with Model H only

*Requires Deck Arm Adapter Kit P/N 2430-10.

Recirculating blade hubs

Unique housing designed to direct air flow

Serrated wing blades for fine mulching

Standard Rotation:
Good for thick, heavy
clippings and debris

Reverse Rotation:
Exceptional cut quality when
clippings are light and dry

Collection Decks

Collection decks are compatible with the Walker Grass Handling System® (GHS) Models S, C, T, and D. Clippings are discharged from the deck through the internal blower and discharge chute, and stored in the GHS catcher box.

C36R

- 36" (91 cm)
- Reverse Rotation
- Compatible with Models S, C19, C19i, T, and D

C48

- 48" (122 cm)
- Standard Rotation
- Compatible with Models C, T, and D

C42

- 42" (107 cm)
- Standard Rotation
- Compatible with Models S, C, T, and D

C48R

- 48" (122 cm)
- Reverse Rotation
- Compatible with Models S18, C, T, and D

C42R

- 42" (107 cm)
- Reverse Rotation
- Compatible with Models S, C, T, and D

C52R

- 52" (132 cm)
- Reverse Rotation
- Compatible with Models C19i, T, and D

Standard vs Reverse Rotation

Standard rotation blades come together at the front of the deck, moving material directly into the rear discharge chute. Standard rotation decks are ideal for users who need to collect thick, heavy clippings, including leaves and other yard debris.

Reverse rotation blades come together at the rear of the deck, moving material around the edges of the deck before it is channeled into the discharge chute. Reverse rotation decks are ideal for users looking for exceptional cut quality, in mowing conditions without wet, heavy clippings or debris.

*Requires Deck Arm Adapter Kit P/N 2430-10.

S48 Gear Drive Deck
(top cover removed)

Gear Drive:
Smooth, exceptional cut quality

S48 Belt Drive Deck
(top cover removed)

Belt Drive:
Flexible mowing, even
in rough conditions

Gear vs Belt Drive

Walker gear-driven decks utilize aluminum or cast iron gearboxes with Zerol bevel gear technology for durable and quiet function. The timed blades provide exceptional cut quality and striping, and allow a compact design for improved trimming and maneuverability.

Walker belt-driven decks use a robust spindle and belt-tensioning idler design, and are best suited for rougher mowing conditions with debris or ground contact occurring. Walker belt-driven decks feature tool-free belt change and easy-to-maintain spindles and components.

Rear Discharge Decks

Designed specifically for Model H mowers with high production and fast mowing speeds, Walker rear discharge decks process clippings numerous times before cleanly and evenly discharging clippings out the back of the deck, leaving an evenly cut turf.

R52

- 52" (132 cm)

Walker Decks: Multi-Deck and Add-ons

Multi-Deck

Designed for customers who need to collect and side discharge throughout the season, the Walker Multi-Deck is a cost effective way to have two mowing styles in a single deck. This quiet, belt-driven deck uses a torsion-flex carrier to freely articulate and follow ground contour for a beautiful cut. And, like other Walker decks, the underside and blades are accessible with the tilt-up function for easy transition between configurations and maintenance.

U48

- 48" (122 cm)
- Belt Drive
- Compatible with Models S18, C, T, and D

Available Deck Add-ons*

- Dethatcher attachment
- Pneumatic Deck Tires
- Deck Height Adjuster
- Adjustable Footrests
- Spyker® Spreader and Mount
- Deck Cuff Kit
- Curb Jumper
- Power Tilt-Up® Deck Lift for S61, R52, R64 decks (Model H only)
- Accelerator® Grass Catcher Kit
- Boom Sprayer attachment
- Breakaway Blades

*Visit walker.com for deck add-on compatibility.

Multi-Deck

Tyler Deiter, owner of Beautiful Estates Landscaping in Peach Bottom, Pennsylvania, mows a customer's lawn with a broken arm. He broke his arm helping a police officer wrangle a steer that had gotten loose on the highway. Since it was his right hand that was injured, he could still operate his Walker Mowers with the cast.

Coming Full Circle in Lancaster County

Throughout his first two years in business, Tyler Deiter resisted the idea of mowing lawns. “I’d always told myself I was going to become a landscaper, not a landscaper,” Tyler says with a grin. Now 10-plus years later, mowing has become a profitable and enjoyable part of Tyler’s business.

The key to making lawn maintenance a successful add-on service has come down to one word: selective. Beautiful Estates Landscaping only offers mowing to select communities within the greater Lancaster County area. This allows Tyler to optimize his routing, which enables him to consolidate mowing to Thursdays and Fridays.

Tyler has also become pretty particular about his mowing methods. He tells customers he will maintain their lawns to a healthy height of 3 to 3-1/2 inches, and will recycle clippings back into the yard as much as possible. Tyler also promotes the fact that his mowers are compact and lightweight, and feature a floating deck that won’t scalp the lawn. Remember, Tyler wanted nothing to do with mowing if it meant he’d become a landscaper.

It took a little while to get where he is today, but Tyler Deiter is a far cry from a landscaper. He has a couple of customers to thank for that.

“One of my landscaping customers who owned a dentist’s office kept insisting that we mow her property,” Tyler says. “One day she came out and handed me a contract. She said if we could match the price, it was ours. So I went and bought a mower and started mowing.”

Tyler’s first mower was a residential-grade zero-turn. It got the job done, but pushed him right to the edge of becoming a dreaded landscaper. A year or so later, Tyler caught a glimpse of a unique kind of mower.

“A customer we were doing flower bed maintenance for had their own Walker Mower,” Tyler says. The mower really piqued Tyler’s curiosity. “The customer said I could use it to pick up leaves when we started doing fall cleanups,” Tyler continues. “I really enjoyed the controls and not having to use a big side chute for a bagger.”

It took a couple years of prodding, but existing landscaping customers finally convinced Tyler to start mowing.

After a couple seasons of running his customer's Walker, Tyler started thinking about getting his own. Then, in the summer of 2018, getting his own became a necessity. It was the wettest summer on record, and Tyler would be unable to mow for a couple of weeks in August.

"The grass was still growing like crazy when my fiancé, Jennifer, and I were about to get married," Tyler recalls. "We knew our yards would be hayfields after being away for our honeymoon. I went to the local Walker Dealer and bought a used Model T so I could do a good job of bagging. It got us through that wet summer, and our customers really liked the way their lawns looked."

"We knew our yards would be hayfields after being away for our honeymoon. I went to the local Walker Dealer and bought a used Model T so I could do a good job of bagging. It got us through that wet summer, and our customers really liked the way their lawns looked."

Aside from the fact that there weren't piles of grass clippings lying all over the lawn, Tyler says customers also noticed that the cut was more even, and there weren't any scalps or ruts. When customers began telling Tyler they wanted him to use his new mower all of the time, he figured he better take a step up. So he sold that first used machine and bought a new Model T with the Power Dump option. He then purchased a new Model B a year or so later. Each of Tyler's Walkers is used strategically throughout the year, leveraging multiple 48-inch decks that

enable him to collect, mulch or side-discharge as conditions warrant.

Grandpa Brings Out a Green Thumb

Tyler Deiter started developing his green thumb at an early age. "I was home-schooled, and couldn't wait to get outside to work in the garden after school," he relates.

Tyler inherited his interest in plants from his grandfather who was in the greenhouse business. When Tyler was 12, his grandpa tore his rotator cuff. He looked to Tyler for some assistance. "He would pick me up in his little pickup truck and take me along to planting jobs," Tyler says.

Many of those planting customers saw how much pride Tyler took in working with his grandpa. Some began asking Tyler to perform other landscaping chores while he was on their property. Within a few years, Tyler had a nice little business going.

"I got my first truck, when I was 16," Tyler says. Then, when he turned 18, he decided to make it official and give his landscaping business a name. After conferring with his father, Beautiful Estates Landscaping was born.

As pointed out earlier, Tyler didn't mow lawns at first. But over the past few years, mowing has become an essential part of the business. Tyler's customers include numerous 1/4 to 3/4-acre residential lawns, along with a few smaller commercial properties. Tyler has also begun subcontracting for another area landscape contractor, spending roughly one day a week mowing an apartment complex.

Throughout the spring, Tyler primarily uses his Model T so he can collect the clippings. He'll also use his Model B to side-discharge areas of a property that are more wide open. During the summer when lawns start drying out, Tyler begins using his Model B almost exclusively with a mulching deck. In the fall, he'll switch back to the Model T with a mulching deck to chop up leaves. "If the leaves are really thick with a lot of moisture, we'll often go over the lawn a second time and vacuum up the excess," Tyler points out.

Since mowing is consolidated to Thursdays and Fridays, Tyler spends the first half of the week mulching, replacing bushes and small trees, planting flowers, maintaining beds, pruning, hedge trimming and light hardscaping. He also subcontracts for another friendly competitor during the winter. He uses that contractor's Walker Mower with a snowblower attachment to keep the sidewalks clear at a medical facility.

Whatever the season, Tyler spends most of his time in the field, working. He also takes care of all the scheduling. But aside from that, his wife, Jennifer, is in charge of other business-related

functions. It's a good thing, too.

"I'm not good at the business stuff at all," Tyler concedes. Jennifer used to work at an ag supply company and is very proficient at billing, accounting and other administrative tasks. "She also grew up on a dairy farm," Tyler is quick to add, "so she is more than willing to get out on jobsites to help push wheelbarrows around and do other work."

As his business has grown, Tyler has needed Jennifer's help on more than one occasion. He has also been able to count on assistance from a few other family members.

A Dozen Siblings Provide a Steady Supply of Labor

Tyler Deiter is the oldest of 13. Many of his nine brothers and three sisters have worked with him at some point.

"I make a great first job," Tyler says. It's not a family requirement to work for him, though. Truth be told, everyone enjoys getting outside just as much as Tyler always has. Just for safe measure, he has a little trick up his sleeve. "I always make sure to entice my siblings with plenty of slushies and soft drinks," Tyler says with a chuckle.

These days, Tyler is joined by five of his brothers. Grant and Kyle work full-time. Kent, Logan and Connor help out as needed. Tyler says he enjoys having a variety of things to do; running his front-end loader one day, pruning the next, and mowing the day after that. As for his siblings, Tyler tries to steer them in the direction of their natural abilities.

"Most of my siblings are hands-on learners," Tyler says. "It's neat to see how each person's God-given talents play out. Kyle, for instance, is really good at running bigger equipment like our tractor and trucks. Grant enjoys the Walkers. Others are better at trimming and edging. Once I can see what their talents are and what they enjoy, I cater their jobs to those tasks."

"I don't think I want to grow anymore or hire additional people," Tyler continues. "I think that would come with a lot of headaches, and I'd like to keep it to just family. Seven years separate my youngest brother and my oldest son. So as long as I can retain my youngest brother long enough to fill that gap, I should be OK for many years to come."

With a casual eye on the future, Tyler Deiter can't help but reflect on the past from time to time, as well. He vividly

Tyler Deiter tries to steer his siblings/employees toward tasks they enjoy and are naturally good at. Pictured here is younger brother, Grant, who has become an excellent mower operator.

remembers all of those mornings when his grandfather picked him up to go plant flowers. When Tyler has a new landscaping project to complete, he calls his grandpa who still has the greenhouse business. "I tell him what I need and he gets it all ready for me to come pick up," Tyler tells.

Talk about coming full circle.

See Tyler's story by watching this video.

SCAN ME

For the 2023 season, Tyler Deiter (seated) is getting help from five of his 12 siblings (from left): Connor, Logan, Grant, Kyle and Kent. Also pictured is Tyler's wife, Jennifer, holding their younger of two sons, Nathan. Tyler is holding their older son, Joshua.

Add-ons: Implements

Implements mount interchangeably on most Walker models using the quick-change hitch system and require the use of the Implement Hitch. Tail weights may also be needed for counterbalancing.

Implement Hitch

The Implement Hitch replaces the mower deck and installs on the tractor in just a few minutes. Implements then slide onto the hitch and lock in place with the flip of a lever for true "quick-change" capability. The Hitch assembly includes operator footrests and an electric power lift. A switch raises and lowers implements and is mounted on the Forward Speed Control lever for convenient operation.

- Models C19, C19i, T, D:*.....P/N H10
- Model H:*.....P/N H19
- Models B, C23i:*.....P/N H22

Option: Tail Weights

Tail weights are used for counterbalancing many Walker front-mounted add-ons such as a snowblower, loader bucket, or rotary broom. Tail weights also improve handling when using large decks on the lighter models. The cast-iron weights bolt directly to the chassis frame or the split-axle tail.

- Model B: 50 lb*.....P/N 4647-10
- Extra 50 lb weight*P/N 4647-11
- Model H: 50 lb*P/N 2647-10
- Model H: 55 lb*.....P/N 2647-11
- Extra 55 lb weight*P/N 2647-6
- Model C19, C19i, T, D: 85 lb*.....P/N 7647
- Extra 10 lb weight*.....P/N 7647-5
- Model R: 80 lb*.....P/N 1647-10

The Implement Hitch allows the Walker to use implements

Tail Weights offset the weight of an implement to maintain balance

Great for removing debris from textured surfaces

Five angle positions

Rotary Broom

The Rotary Broom, with a 47" or 60" sweeping path and five-position angle head, is ideal for sweeping debris or light snow from hard surfaces.

The Rotary Broom excels at sweeping and removing gravel and debris from turf areas along roads, paths, and playing fields, and can also be used for lawn dethatching and raking. Down pressure is spring counter-weighted and is adjustable for great sweeping action and minimum brush wear. The Rotary Broom is another way to extend the usability of the Walker commercial riding lawn mower. Requires Implement Hitch (see page 46).

Models C, T, D: 47"P/N H13

Model H: 60"P/N H20

Optional Gauge Wheels:

Available to better control depth of brush engagement. Especially useful when working on turf. **P/N 1399**

Add-ons: Implements

Dozer Blade (48" or 60")

The Dozer Blade is a powerful tool able to tackle a variety of tasks, from cleaning up after a snow storm to backfilling irrigation trenches. It is designed and built by Walker, using the latest fabrication technology, precision tooling, and quality workmanship.

Blade design features a simple foot-actuated angle-adjust mechanism that allows the operator to quickly set the blade to five different positions. The design also employs trip-over protection with adjustable preload, and $\pm 5^\circ$ of lateral articulation to follow ground contour for even cleaning over the full width of the blade, and integrated footrests. The steel cutting edge is replaceable, with four mounting positions for extended life.

Requires Implement Hitch (see page 46).

Models C, T, D, B, H: 48" (122 cm)P/N H11

Models T, D, H: 60" (152 cm) P/N H16

An optional Polyurethane Wear Edge Kit is available for use on sensitive surfaces:

48" (122 cm)P/N 6625-10

60" (152 cm)P/N 6625-11

Loader Bucket

A versatile tool for landscaping work, the Loader Bucket will push, scoop, haul, and grade dirt, stone, gravel, and mulch. It lifts approximately 180 lb (82kg), holds 2.25 cu. ft. (64 liter) of material, and features 14" (36 cm) ground clearance for transport. The Loader Bucket has high-strength steel construction with independent lift and dump controls powered by dual electric actuators. It is available for use on models T and D. The Loader Bucket requires an Implement Hitch (see page 46). **P/N H18**

Replaceable wear edges

Debris Blower

Useful for landscape clean-up and leaf removal, the Debris Blower quickly mounts to the Implement Hitch and gives the Walker Mower owner full three-season use.

The 13.5" (35 cm) Debris Blower delivers 125 MPH velocity and a 230 degree manual directional control. The same high-quality construction found in each of our commercial mowers is built into this and each implement we offer. It is available for use on models B, C, T, and D. It requires an Implement Hitch (see page 46). **P/N H14**

Two-Stage Snowblower (42" or 50")

This powerful add-on throws snow up to 40 feet (12 meters) with a directional discharge spout that can be adjusted 228 degrees from the operator seat. The chute pitch-adjustment allows for fine control of throw angle and distance, and comes with an optional electric control kit. With the electric height-adjustment of the Implement Hitch, the Snowblower will make quick work of even the deepest of snowfalls. It requires an Implement Hitch (see page 46).

Models C, D, T, B, H: 42" (107 cm) P/N H12

Model H: 50" (127 cm) P/N H17

Optional Chute Control Kit:..... P/N 6623-4

Note: Required for use with Operator Hard Cab.

Throw snow up
to 40 feet

Add-ons: Attachments

Attachments mount interchangeably on most Walker models and do not require the use of an Implement Hitch. Some attachments replace the deck, while others attach to the deck or to the tractor body.

Hard Cab

The Hard Cab shields the operator from winter weather when using a Snowblower, Rotary Broom, or Dozer Blade. It includes two hinged doors, glass windshield with electric windshield wiper, LED headlights, and circulation fan. It requires a ROPS kit for mounting (see page 49). Compatible only with H models. **P/N A33**

Optional Operator Cab Heater

Use only with Model H37i:..... **P/N 2200-24**

Blade Angle Adjustment Kit

Use with 60" Dozer Blade:..... **P/N 6623-30**

Snowblower Chute Control Kit

Use with 50" Snowblower: **P/N 6623-4**

Soft Cab

The Soft Cab shields the operator from winter weather when using a snowblower, rotary broom or dozer blade. It features a hinged door with glass windshield, electric windshield wiper, and LED headlights. **P/N A17**

Models D, T Mounting Kit: **P/N 7660-23**

Model B Mounting Kit:..... **P/N 7660-24**

Model C19, C19i Mounting Kit: **P/N 7660-25**

Front Cab Extension Flap

Protects operator when using Dozer Blade: **P/N 7661-4**

Protection from winter elements

See all Walker attachments:
walker.com/addons#attachments

ROPS comes standard on Model H24d

ROPS

The Walker Roll-Over Protection Structure (ROPS) consists of a high-strength steel roll bar and retracting inertial-reel seat belt. The ROPS system features a hinged roll bar that can be folded down for convenient transport and storage.

- Models H27i, H24d..... P/N A30**
- Model H37i, H38i..... P/N A34**
- Models C19, C19i, D, T..... P/N A37***

**Seat belt ordered separately. Suspension Seat (6103-14) P/N 2302-8, Standard Seat (5103) P/N 5103-9, Comfort Seat (6104-31) P/N 6104-7.*

Blow snow without an implement hitch

Single-Stage Snowblower 36"

Just the right size for tackling sidewalks and driveways, the 36" (91 cm) Single-Stage Snowblower attachment mounts directly in place of the mower deck in just a few minutes. A simple, manual lifting mechanism and footrests are integrated with the Snowblower mount. No separate implement hitch is required. The Snowblower is compatible with models S, C19, C19i, T, D, and B. The Snowblower is the perfect winter season add-on to give the Walker year-round versatility. It is a compact, powerful addition to the Walker Mower, throwing snow up to 20 feet. **P/N A11**

Spyker® Spreader Attachment

The Spyker® Spreader Attachment combines a Spyker® S80-12010 Pro-Series Spreader with the versatile Walker Mower. No tools are needed to secure the spreader to the carrier frame of the Walker 42", 48", or 52" gear-driven decks.

- Spyker® Spreader and Mount..... P/N A39**
- Spyker® Spreader Mount only..... P/N A38**

Add-ons: Attachments

Dethatcher

The Dethatcher on the front of the Walker Mower is the ideal setup to quickly dethatch and mow a property. When used with the Grass Handling System® on Models S, C, T, and D, lawn thatch and debris are lifted, vacuumed, and collected in one pass. The Dethatcher features front-gauge wheels which allow the dethatching tines to maintain consistent depth on uneven or articulating properties.

The Dethatcher quickly attaches to the front of most 42", 48", and 52" Walker gear-driven decks with integrated adjustable mounting saddles. A lift lever with foot trigger lowers and raises the Dethatcher for easy transport when driving between lawn areas. Gauge wheels are adjustable to set and tune tine depth. The foldable handle allows the Dethatcher to be stored vertically against a shop wall or tied down against a trailer sidewall. **P/N A10**

Optional Wall Mount:

Securely and compactly mount the Dethatcher off the floor in a space-saving manner on your shop or garage wall! **P/N 6606-11**

Lift and remove thatch quickly and easily

Tool-free installation

Boom Sprayer

A helpful attachment for property maintenance, the Boom Sprayer easily mounts to most 42", 48", and 52" Walker decks, and offers a 96" (244 cm) spray pattern, allowing operators to apply fertilizer or weed control in an efficient manner. A spray gun with a 20-foot (6 meter) hose allows the operator to leave the mower and apply liquid material to all landscape features. The spray tip adjusts to offer varying output, from a mist to a 35-foot (11 meter) stream. The 25-gallon (95 liter) tank allows easy cleaning of the tank and spray system. **P/N A16**

Mounting on 52" decks requires two Rear Sprayer Supports **P/N B037**

48" Dozer Blade

Developed to provide a durable, simple, and productive attachment for the Walker, the Dozer Blade incorporates a manual lifting mechanism with foot trigger release and built-in footrests not requiring an implement hitch. The Dozer Blade features a foot-actuated, angle-adjust mechanism that allows the operator to quickly set the blade to five different angles. The blade employees trip-

over protection with adjustable preload to allow operators to focus on productivity, not on what is hiding under the snow or dirt. A replaceable steel wear edge comes standard, and an optional polyurethane wear edge is also available. The blade mount also allows +/-5 degrees of lateral articulation to follow ground contour for even clearing over the full width of the blade. Tail weight required with use of blade. See page 46.

Replaceable
Wear Edges

48" Dozer Blade
on the Model R

- Optional Armrests..... P/N 6104-17

Suspension Seat

Made by Grammer, this full-spring Suspension Seat includes dampening and adjustments for back angle, lumbar support, and operator weight. Armrests are standard on the Suspension Seat. This seat is standard on Models D21d and H24d, and is required for a ROPS seat belt. P/N 6103-14

- Models B23, B27i Mounting Kit..... P/N 6103-51
- Model C19, C19i Mounting Kit..... P/N 6103-52
- Model H Mounting Kit..... P/N 6103-53
- Model T Mounting Kit..... P/N 6103-54

Armrests

Foldable Armrests can be added to the Comfort or Standard Seat. They offer enhanced operator comfort and security. Armrests conveniently fold up when not in use. Armrests are standard equipment on the Suspension Seat.

- Standard Seat:..... P/N 5885
- Comfort Seat:..... P/N 6104-17

Suspension Seat absorbs bumps as the mower goes over rough terrain

See all Walker options:
walker.com/addons#options

Utility Bed

The Utility Bed can replace the rear body assembly on the Model B, providing convenient storage and transport of material or tools. With manual dump functionality, the Utility Bed also adds all-season versatility to the Model B or H24d. It is standard on Models H24d and the non-collection versions of T23, T27i, and D21d. **P/N 4650-2**

Headlights

The LED Headlights incorporate a durable, cast aluminum housing with four LED lamps in each light assembly. The lights are positioned to illuminate the front and sides of the mower deck, providing increased situational awareness and safety for both the operator and bystanders.

Models C19, C19i, H27i, H24d	P/N 5989-13
Model B	P/N 5989-17
Model S	P/N 5989-14
Model R	P/N 5989-15
Models D, T	P/N 7989-14
Model H38i	P/N 2989-12

Increased safety
for early morning
and evening work

Cup Holder

Featuring a unique front-mount design, the Cup Holder gives the operator easy access to his or her drink. The Cup Holder frame is powder-coated metal and incorporates rubber tabs to secure different sized and shaped cups and tumblers up to 3.25" in diameter. It is not Model R compatible. **P/N 5744-9**

Instrument Panel Cover

This sturdy canvas Instrument Panel Cover protects the instrument panel on Walker Models D and T when parked outside or trailered in rain or snow. **P/N 7307-2**

Add-ons: Options

Power Dump

The Power Dump provides convenience and time savings to commercial mowing companies and homeowners alike by giving the operator the ability to dump the grass catcher from the operator seat. A toggle switch operates the 12-volt electric linear actuator that provides the dumping and door-opening action, which completes in about 10 seconds.

- Model S18 (for 7.0 bu.).....P/N A48
- Model C19, C19i (for 7.0 bu.)P/N A46
- Model C23i (for 10.0 bu.)P/N A52
- Models T, D (for 10.0 bu.)P/N A51

Hi-Dump®

The Walker Hi-Dump® raises up 67" (170 cm) and dumps collected grass and debris into a truck or trailer in a 20-second cycle without the operator ever needing to leave the seat. Powered by a 12-volt electric/hydraulic system, the lifting and dumping functions work independently and are controlled by two toggle switches near the operator seat. It is available for Models D and T. **P/N A21**

Dump grass without leaving your seat

Lifts up 67"

Turn collection into rear discharge

Prevent clogging in wet conditions

Transfer power when not using GHS

No-Catch Deflector

The No-Catch Deflector easily installs in the grass catcher door frame to allow "non-collection" rear-discharge mowing with GHS models. Grass clippings are safely deflected downward and spread across the door opening.

7.0 bu. Catcher..... P/N 7500-2
10.0 bu. Catcher P/N 8500-2

Large Hole Screen

When mowing in wet conditions, this screen with 3/4" holes stays cleaner to help prevent clogging. This screen easily interchanges with the standard screen.

7.0 bu. Catcher.....P/N 7512-13
10.0 bu. CatcherP/N 7512-11

GHS Blower Lockout

The Blower Lockout disengages the Grass Handling System® (GHS) blower to reduce noise and increase power when using a side discharge deck, mulching deck, or PTO-driven attachment or implement. Disengaging the blower also prevents grass, snow, or debris from entering the grass catcher. **P/N 7541-1**

Dump Bins

These two bins slide into the Walker 10-bushel catcher, making the dumping of grass clippings much easier by dividing the weight. This is especially useful for single operators working by themselves.

Set of Dump Bins.....P/N 8510-11
Left Side Dump BinP/N 8510-9
Right Side Dump Bin.....P/N 8510-10

Dump Bag

The reusable, fabric Dump Bag helps make on-the-job cleanup a lot easier. It is sized to fit the grass catcher door opening, allowing the operator to cleanly handle clippings and easily transport them.

10.0 bu. CatcherP/N 5598-2

Add-ons: Options

Deck Height Adjuster

The mechanical Deck Height Adjuster installs directly onto the Walker mowing deck. It offers quick and easy cutting height adjustments in 1/4" increments, using a single hand lever within reach of the operator seat.

*A26 S/N 163318 and prior S52 decks.

**A27 S/N 187999 and prior S62 decks.

Deck Height Washers

Deck Height Washers allow finer adjustments of cutting height on compatible decks. Use these to adjust deck height by 1/4".

36", 42", 48", 52", 54", 56" gear or belt drive decks	P/N 5727-1
52", 62" belt drive, 74" gear drive decks	P/N 8727

Curb Jumper

This 36" (91 cm) wide curb ramp allows Walker Mowers to easily back over a standard curb for access to medians, landscape areas in parking lots, and raised beds. When not in use, the ramp stows on the mowing deck carrier frame and functions as an expanded footrest.

Standard Decks	P/N 5597
Deck Height Adjuster Decks	P/N 5597-1

→
Store as a footrest

Fine-tune cutting height

Easy to use ramp

Power Tilt-Up®

Available for the Model H, the Power Tilt-Up® makes it easy to automatically tilt up decks for maintenance, transportation and storage. Tilt-up action uses a 12-volt electric linear-actuator easily mounted to any Model H mower equipped with an S61, R52, or R64 deck with adjustable footrests. The use of a tail weight is suggested when using this option (see page 46).

Models H27i, H38i P/N A35
 Model H24d P/N A36

Avoid heavy lifting; mechanically lift decks

Control panel on the rear of the mower for safe operation

Breakaway Blades

Use Breakaway Blades in mowing conditions with frequent ground contact and/or excessive debris. Breakaway Blades lessen the impact and shock loading on the deck drivetrain and reduce blade damage. Cutting blades can be easily replaced or removed for sharpening.

S56 P/N 5705-32
 S42 P/N 5705-33
 S74 P/N 5705-34
 S48 P/N 7705-8

Reduce damage when mowing debris

Add-ons: Options

Deck Cuff

Airflow and deck contour tend to push grass at the very edges of the deck away from the cutting blades. The Deck Cuff acts as a channel to direct grass at the edge of the deck into the blade cutting path, restoring full deck cutting width.

- C36R..... P/N 7704-2
- C48R..... P/N 7704-4
- C52R..... P/N 7704-5

Spread Axle Tail Wheel

The Spread Axle Tail Wheels track in line with the drive tires for grass conditions where the center tail wheel track may not be preferred. This offers a clean look to the striping, improves straight tracking, and also contributes to stability when operating on hillsides.

- Spread Axle Assembly..... P/N 7420-3
- Tank Relocation Kit Required for D21d P/N 7420-8

Wider wheel base = better hillside stability

Dual Tail Wheel

The Dual Tail Wheel comes standard on Models T, D, and C23i (equiped with 10.0 bu. catcher). Featuring two independent pneumatic tires, it offers less turning resistance than the Single Wide Tail Wheel, offering mowing with greater agility and precision. P/N 7420-20

Direct grass into cutting path

Less turning resistance with greater agility

Single Wide Tail Wheel

The Single Wide Tail Wheel creates a single, uniform tire stripe in the middle of the cutting width for a clean-looking stripe pattern. It is not recommended for delicate turf, D Models, or machines equipped with a Hi-Dump® due to the increased turning friction/resistance at the contact point of the tail wheel.

P/N 8049

Creates a single, uniform tire stripe

Adjustable Footrests

These Adjustable Footrests clamp onto the carrier frame. They are easy to install and adjust, making for a comfortable ride for operators with shorter legs.

36", 42", 48", 52"P/N 8662-10
74"P/N 8662-9

Better comfort for operators of all heights

Add-ons: Options

Tail Wheel Lock

The Tail Wheel Lock uses a locking solenoid and detent to hold the tail wheel into a "straight ahead" position. This dramatically improves the ability to create straight stripes and stability for hillside mowing. An On/Off toggle switch located on the Forward Speed Control makes it easy to control from the operator seat. **P/N 8540**

Big Tire Fork Kit

This kit, available for the Model B only, uses a larger, 20" drive tire along with taller tail wheel and deck caster forks. It provides increased cutting heights up to 5", higher ground speed, and improved operator comfort in rough conditions.

For use with 8" Deck Tires P/N 5076-12

For use with 11" Deck Tires..... P/N 5076-13

For use with S60 Deck..... P/N 5076-14

Note: 20" Drive Tires are purchased separately, using P/N 5076-3 Turf Tire or P/N 8070-20 AT Tire.

Lock tail wheel in "straight ahead" position to help create straight stripes

For faster, more comfortable operation

Taller Deck Caster Forks

Larger, 20" Drive Tires

Taller Tail Wheel Fork

Use on narrow decks 

Preferred for delicate turf and hills 

Turf Tires

18 x 7-8 Turf Tire

The 18 x 7-8 Turf Tire is ideal for use with narrow decks, attachments, or implements. With these tires, the overall width of the tractor stays within the cut width of Walker's 36" decks. Compatible with Models S, C19, C19i, T, D, R, and B. **P/N 5033-6**

18 x 8.5-10 Turf Tire

The 18 x 8.5-10 Turf Tire features a low-profile sidewall for increased stability on slopes and less sidewall flex in turns. The 18 x 8.5-10 Turf Tire keeps overall tractor width less than 42", ideal for narrower decks, attachments, or implements. This tire is standard on Models B, C, S18, and Models T and D with ROPS. Compatible with Models S, C, T, D, R, and B. **P/N 5075-3**

 Standard on Models B, C, S and T & D with ROPS

18 x 9.5-8 Turf Tire

The 18 x 9.5-8 Turf Tire is a good balance of low ground pressure, operator comfort, and deck overhang for trimming ability. It is the standard tire on Model T and Model D Walker Mowers without ROPS. Compatible with Models S, C, T, D, R, and B. **P/N 7070-2**

 Standard on Models T and D without ROPS

18 x 10.5-10 Turf Tire

The 18 x 10.5-10 Turf Tire provides optimum traction and a large contact area, reducing ground pressure and protecting the turf. The low-profile sidewall improves hillside handling. Due to its width, and for optimal trimming, it should be paired with 48" or larger decks. Compatible with Models C, T, D, B, and R. **P/N 8075-4**

Add-ons: Options

All Terrain Tires

18 x 7-8 Directional AT Tire

The 18 x 7-8 AT Tire features a high-traction, directional tread. It is ideal for increased traction in a variety of situations such as snow removal, dirt work, and mowing where a narrow, aggressive tire is needed. It is perfectly paired with the 36" Single-Stage Snowblower, the 48" Dozer Blade, or 36" and 42" decks. Compatible with Models S, C19, C19i, T, D, R, and B.

Left Drive Tire: P/N 5034-1

Right Drive Tire: P/N 5034-2

18 x 8.5-10 AT Tire

These aggressive 18 x 8.5-10 high-traction tires feature increased traction useful for snow removal, dirt work, and other challenging mowing conditions. The tire width maximizes deck overhang for improved trimming capability, as well as dozer blade overhang to increase blade side reach. Compatible with Models S, C, T, D, R, and B. **P/N 8070-9**

18 x 11-10 AT Tire

The 18 x 11-10 All Terrain Tire is ideal for increased traction in a variety of situations ranging from hillside mowing to snow removal. It also features a low-profile sidewall for increased stability and performance. Compatible with Models C, T, D, R, and B.

P/N 8070-12

✓ **Standard on Model H**

23 x 10.5-12 AT Tire

The 23 x 10.5-12 All-Trail Tire features a moderately aggressive, bi-directional tread pattern ideal for challenging turf applications. The All-Trail Tire improves traction and hillside performance for the Model H. Compatible with Model H. **P/N 2071-4**

Pair with 36" snowblower, 48" dozer blade, or 36-42" decks

Improved trimming capability, and dozer blade side reach

Increased traction and performance on hillsides

Ideal for snow, dirt,
and challenging
mowing conditions

Standard tires on
most Walker decks

Can adjust air pressure

23 x 10.5-12 Directional AT Tire

The 23 x 10.5-12 Directional All-Terrain Tire provides improved traction for the Model H and is ideal for snow, dirt, and challenging mowing and implement conditions. The Directional AT tread layout is open enough to shed snow and mud, yet the tire rolls smoothly and performs well on manicured turf. Compatible with Model H.

Left Tire: P/N 2070-5
Right Tire: P/N 2070-6

Deck Tires

Semi-Pneumatic Deck Tire

Never again experience the downtime of having a flat deck tire. The Semi-Pneumatic Deck Tires are molded, structural rubber with a hollow core, and come standard on most Walker Decks. Compatible with Models S, C, T, D, and B.

Tire, wheel and axle assembly: P/N 5715-23
Tire only: P/N 5715-16

Pneumatic Deck Tire

For operators who like the ability to fine-tune the performance and ride of their Walker Deck, we offer a pneumatic tire option. The Pneumatic Deck Tires replace the standard semi-pneumatic tires and allow for adjustment of air pressure. Compatible with Models S, C, T, D, and B.

Tire and inner tube only: P/N 5715-15
Tire, inner tube, and wheel assembly: P/N 5715-24

Tire Chains

The Tire Chains are used for extra traction while working in snow with a Walker Snowblower, Rotary Broom, or Dozer Blade. There are tire chains to fit every Walker model.

Standard Features

- Gasoline engines require unleaded 87+ octane
- Diesel engines require 2-D
- Full pressure lube systems with filter
- Heavy-duty stamped steel cutting blades, tempered
- Flywheel alternator charging, D21d has belt-driven alternator
- Internal mechanical parking brake
- Safety circuitry provided by safety switches: Seat, transmission neutral, blade clutch, and parking brake
- Electric blade clutch with easy pull/push switch operation on Models R, B, S and C23i
- Dual-lever steering, precision friction-lock Forward Speed Control lever with neutral/park position
- All machines feature dual, independent hydrostatic transmissions
- Cutting height 1.5" to 4", 1.5" to 4.5", or 1" to 5", varies per model
- Welded, heavy gauge, steel chassis
- Decks and add-ons powered by splined PTO shaft with dual u-joints allowing dynamic articulation, except for the Model R
- Deck carrier frame with flexible deck suspension, caster wheels, and counterweight springs
- Welded, 14 gauge steel bodies
- Welded, 11 gauge steel decks
- 12V electrical systems
- Blade clutch and brake with manual belt tightener C19, C19i, T, D, H
